

Health Information and Disclaimer

Our client's health is of the utmost importance to us. The products and services being recommended have been proven safe and effective for most clients. Individual results may vary. There are many contributing factors that cause hair loss and those same contributing factors can also affect results. Please be patient. Strong, healthy hair grows on average of $\frac{1}{4}$ - $\frac{1}{2}$ inch per month. For those with thinning/aging hair, it takes about 2 to 4 months typically, for noticeable results, but some may take longer. Hair loss is gradual; worsening over time and results also take time. Best results are generally achieved between 12-24 months.

Minoxidil Warning: 2% - 5% Minoxidil is sold over the counter and is generally safe for most people; although not recommended for everyone.

****Do not use if you are under 18 years of age. Do not use during pregnancy or while nursing. If you suspect that you are pregnant, you should not use minoxidil. It is your responsibility to advise of any changes, such as becoming pregnant while on the product or program.**

****Discontinue use of Minoxidil if you experience unwanted facial hair growth, scalp irritation, faintness, dizziness, a rapid heartbeat or chest pain, swollen hands or feet or a sudden unexplained weight gain. Minoxidil is for external use only. Keep out of the reach of children.**

I acknowledge that I am not pregnant. I agree to discontinue use of Minoxidil immediately, if I become pregnant and advise you of such change.

Low Level Light Therapy (LLLT): Although LLLT has no heat component and is generally very safe, it's important to avoid looking directly at the light or viewing with optical lenses. Lasers cleared by the FDA to promote hair growth include HairMax LaserComb®, HairMax LaserBand®, iGrow, Theradome™, Capillus LaserCap® and the MEP-90 (clinical unit), are the only lasers allowed to claim "stop hair loss and regrow hair". There have been no reported side effects in the studies. All other devices; categorized as cosmetic, help promote the appearance of the hair ("fuller, thicker, healthier looking" hair).

The professional device provided at this location is for cosmetic use only; for which we make no claim and is not intended to treat, cure, mitigate or prevent any disease. Protective eyewear is available.

I understand the information and instructions given to me and have read and understand the above warning.
